

100% innovative

Seedless Sweet Pepper

Pepperito® is the Breedx flagship product. Our pepper is 100% seedless (SLP), snack-sized, very crunchy, colorful and sweet-tasting – the ultimate healthy snack!

Pepperito is a totally seedless fruit grown from seeds, produced from a vigorous plant type that is adapted to long-cycle cultivation.

Our Non-GMO varieties have been developed using classic breeding techniques of crossing and selection. Our varieties give robust production year-round and have tolerance to abiotic stresses.

The fruits produced are very tasty, versatile in usage and reduce preparation time for the consumer.

A Versatile Portfolio for Every Need

Our Pepperito® portfolio includes 100% seedless sweet peppers and different pepper types, each tailored to meet diverse growing conditions and market demands:

1-Bite

The perfect bite-sized snack: just 4–7 cm of pure flavor with zero fuss. Crunchy, colorful, and ready to pop!

2-Bite

Small, pop-in-your-mouth peppers perfect for snacking, lunchboxes or appetizers, delivering a concentrated burst of flavor.

Mini-Kapia

Snack-sized, elongated peppers with exceptional crunch and sweetness. The varieties thrive under different climatic conditions—some designed for optimal performance in spring and summer crops, while others are bred to excel in winter or cooler climates.

Midi-Blocky

A medium-sized blocky pepper, perfect for stuffing or slicing, combining rich flavor with vibrant colors.

Long Conical

Sleek, elongated peppers offering an elegant look and intense sweetness, ideal for gourmet dishes and unique presentations.

Breedx Tomatoes A Palette of Flavor and Color

Our taste tomato portfolio brings together a rich variety of colors, sizes and flavors – from small and sweet to larger and tangy, soft to crunchy – offering versatility for every culinary occasion.

Our tomatoes range in size from 10 to 100 grams per fruit, delivering exceptional flavor and brix values of at least 9.0, ensuring natural sweetness and outstanding taste. Their distinctive appearance combines glossy, vibrant markings of deep red-chocolate, green, yellow and brown – making every tomato a visual and flavorful delight.

Mini Plum

Bursting with flavor in a compact form, our Mini-Plum tomatoes are the ultimate bite-sized delight.

Naturally sweet and snackable, these vibrant little gems offer a perfect balance of texture and taste. Known for their reliable performance, Mini-Plums deliver a satisfying crop that's great for fresh snacking, lunchboxes, and gourmet dishes.

Midi Plum

Larger than Minis but just as irresistible, our Midi-Plum tomatoes bring a full-bodied flavor in a perfectly balanced size. With their rich taste, firm texture, and extended shelf life, they're ideal for cooking, slicing, or elevating salads.

A versatile choice with a bold personality.

Specialty

This is where tomato innovation truly shines. Our Specialties collection offers a curated mix of standout varieties, showcasing a range of colors, intriguing shapes, and bold, unexpected flavors.

With distinctive markings and forms, each variety tells its own story, crafted to surprise, inspire and delight.

Roma

Bold, classic and full of character – our Roma tomatoes are prized for their dense flesh and rich, concentrated flavor. Ideal for sauces, pastes, and all kinds of cooking, they're a kitchen staple that brings timeless quality to modern culinary creations.

Company Profile

Breedx is a global specialty vegetable development company dedicated to developing, promoting, and commercializing specialty vegetable varieties that deliver unique consumer benefits. We focus on creating high yielding premium products that add value to growers, to retailers and to consumers— driving innovation, quality and sustainability throughout the fresh produce supply chain.

Breedx will release product catalogues, technical specifications and growing recommendations for its varieties from time to time. These recommendations constitute a "recommendations only" and are non-binding.

The growers must exercise their own skills, experience, care and judgement and consider local growing conditions when producing the crop.
